## Cart for transport of ventilated patients within the hospital

While moving ventilated patients -for instance between Intensive Care Unit (ICU) and operating room (OR) or X-ray department-, the respiratory equipment and any additional equipment as infusion pumps needs to go along with the patient during transport. This cart is at the bedside of the patient and includes all associated equipment necessary during transport. See the next page for a explanation of the configuration.

### Configuration

- ✓ SVR 54-150 base cart with side covers, serum holder and bottle brackets
- ✓ Medical isolation transformer with Jobarco Careflex cable and 7-way socket strip
- ✓ Custom battery pack in undercarriage
- ✓ Customized bracket for connection onto the bed
- ✓ Various custom brackets, runners and holders for placing the equipment

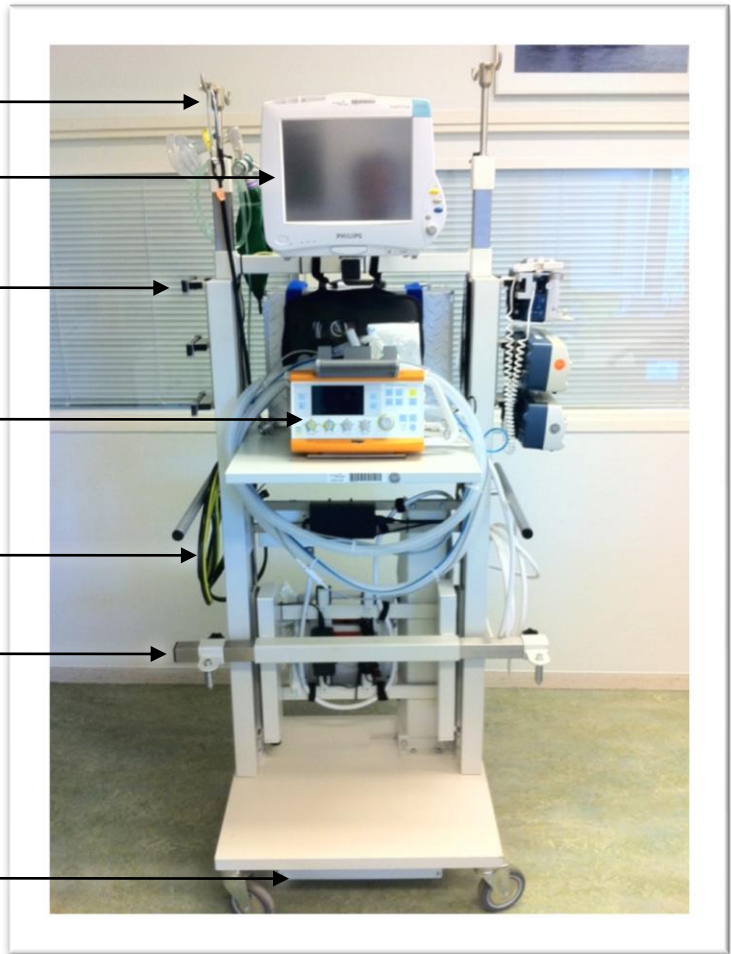

### Interested?

Feel free to ask for more information about our products. We will be happy to assist you.
