Flexx three medical equipment cart

The Flexx three medical equipment cart is the double stack model in the Flexx cart line and is designed for a compact installation of medical equipment, medical accessories and disposables. This model can be used for a variety of applications, ranging from storage cart for disposables to more complex medical applications, such as the setup of endoscopy equipment or pacemaker programmers.

Modular concept

The Flexx line carts are all based on a standardized modular concept, allowing to assemble each cart configuration according to customer requirements.

The basic Flexx three cart contains a solid undercarriage with 100mm double wheel castors, of which the front two are equipped with a double break. The two vertical stacks can be used to place shelves and drawers with 43cm width. The two vertical column contains a cable channel and a stainless steel section for mounting the accessories.

Available accessories are:

- Shelves & Drawers
- Holders & brackets, such as IV poles, scope & camera holders
- Gas cylinder holders
- Monitor mounts
- Power strip, mains cable,
- Isolations transformers

Please feel free to discuss specific features if above-mentioned accessories do not meet your requirements. We can design and produce tailor made products that will meet your expectations.
